Forecast for Wednesday 04 Sep 2024

Weather: Mainly dry to start with some early sunshine. Cloud will bubble up through the morning bringing scattered showers by late morning, some of these will be heavy and slow-moving into the afternoon with a low risk of thunder. Showers will tend to clear through the evening. Gentle to moderate summit winds but gusty near showers.

Chance of cloud-free hill tops above 800m: 80%

Low cloud and visibility: The odd patch of cloud around 700-800m early morning, otherwise cloud bases above summit level. Visibility will be generally very good, but falling moderate or poor in showers with a risk of cloud bases temporarily dropping to 800m where heavier showers remain slow-moving over any one place.

Meteorologist's View
Nothing to add.

Forecast for Thursday 05 Sep 2024
Weather: A rather cloudy morning with the odd spot of light rain across eastern fells. Tending to brighten up through the day for most places with the best of the sunshine across the south and west.

Maximum wind: Increasing to 35-40 mph on summits through the afternoon.

Chance of cloud-free hill tops above 800m: 30%, best chance in the south and west.

Low cloud and visibility: Cloud bases 700-900m in the north and east, occasionally lifting and breaking up at times in the afternoon. A few patches of cloud around 900m across the south and west but otherwise largely clear of summit cloud. Visibility generally good below cloud bases.

Temperature: **Valleys:** Plus 11 Celsius rising 19 Celsius.
At 800m: Plus 6 Celsius rising 10 Celsius.
Freezing level: above summits
